

MM-100 MINI-MOUNTER

Simplicity, value, and impressive productivity.

MM-100 Mini-Mounter offers the perfect combination of automation, price and versatility.

Designed especially for discriminating low volume labs and professional service bureaus, the MM-100 Mini-Mounter is a refreshingly straight forward approach to quality slide mounting.

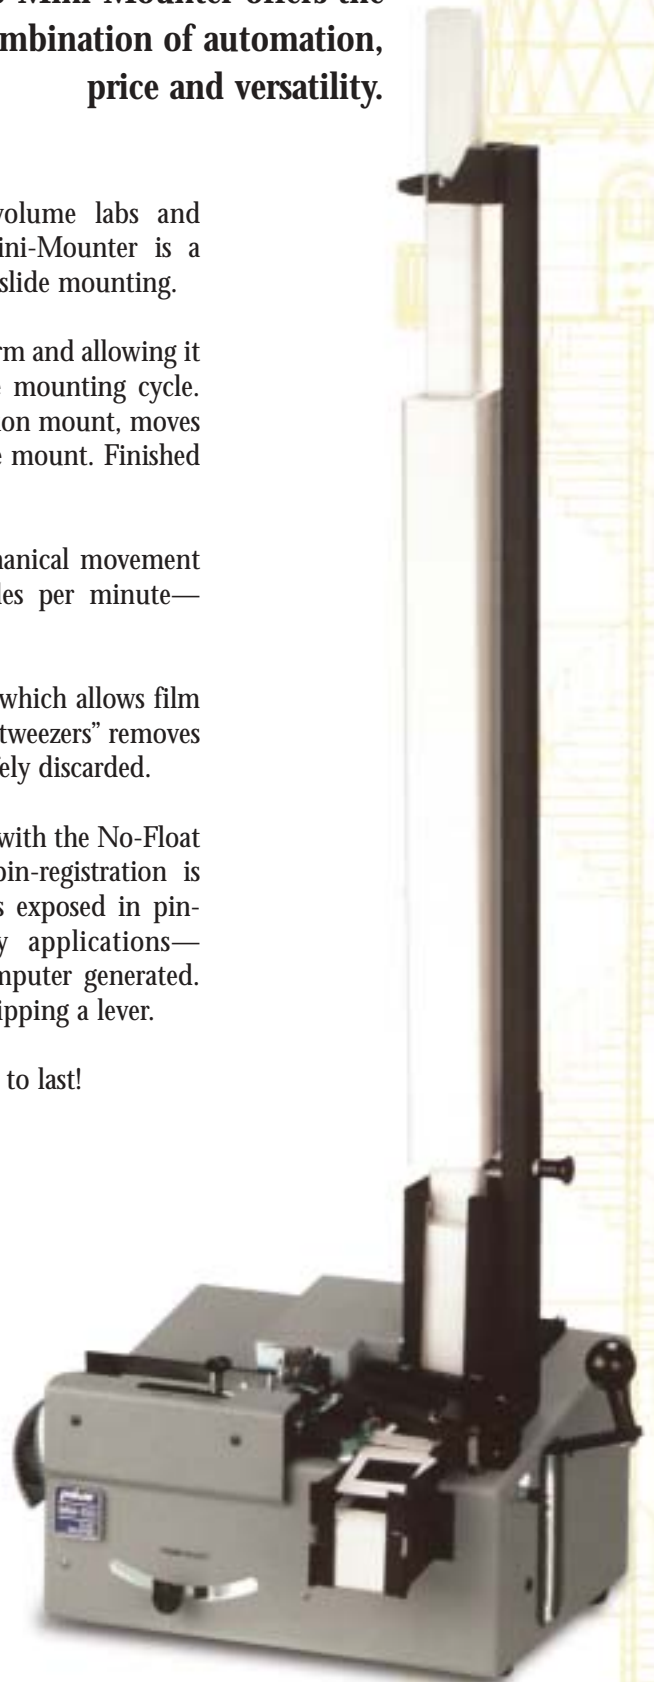

Simply pressing down on the mounter's control arm and allowing it to return to its "home" position completes one mounting cycle. Each actuation advances and opens an empty Pakon mount, moves film ahead one frame, cuts and inserts it into the mount. Finished slides are delivered into the receiver tray.

It's fast and simple. The mounter's precise mechanical movement enables users to produce over 45 finished slides per minute—without heat or compressed air!

Special feature include an ingenious mechanism which allows film or splices to be diverted for trimming. A built in "tweezers" removes the scrap from the mounting area so it can be safely discarded.

MM-100 Mounter uses both Pakon Pro-mounts with the No-Float feature—and Pakon Pin-Lock mounts when pin-registration is required. This ability to accurately mount films exposed in pin-registered equipment is invaluable in many applications—particularly where text or graphic slides are computer generated. Changing between mount styles is as simple as flipping a lever.

MM-100 Mini-Mounter is feature-rich and built to last! And it all comes at a price that doesn't break the bank—providing once again that good things do come in small packages!

MM-100 Slide Mounter shown here with optional arbor support and arbor for automatically feeding up to 500 mounts.

FEATURE-RICH, OFFERING REAL PRODUCTIVITY AND VALUE FOR THE DISCERNING LOW VOLUME FINISHER OR PROFESSIONAL SERVICE BUREAU.

The optional MI-100 Mini-Imprinter prints a numeric date (MM/DD/YR) and sequential numbers slides from 1-99 as they exit the MM-100 Mounter. Regardless of mounting speed, the dot-matrix printer keeps up, consistently placing clean, crisp imprinting on slides in the tray-read location.

- **40 plus slide/minute** production rate saves significant time and labor over hand mounting.
- **Precision mechanical movement** eliminates the need for heat or compressed air. No nonsense design makes mounter simple and easy to maintain.
- **Illuminated film track** facilitates frame indexing, image preview, and alignment. Film track light is mounter's only electrical requirement.
- **Frame alignment guides** located on the edge of the film track, aid frame indexing when frame lines are not readily visible.
- **Frame adjustment control** fine tunes film position, assuring accurate cuts on frame lines.
- **Spring-loaded receiver tray** holds up to 50 slides and allows an entire stack of slides to be pulled straight out of the tray, simplifying order handling.
- **Film curl compensation** accommodates a wide range of film curl, assuring trouble-free mounting and maximum film safety.
- **Standard or Pin-registered mounting** at the push of a button enables the MM-100 mounter to accurately mount films exposed in pin-registered cameras.
- **Film deflector** allows film leader, mis-frames, and splices to be neatly trimmed without removing film from the track.
- **Film tweezers** safely removes even tiny slivers of scrap film from mounting area, assuring trouble-free operation.

Splice eject mechanism and film tweezers allow unwanted scrap to be trimmed and safely discarded without removing film from the mounter's film track.

Using the MM-100 mounter in tandem with MS-100 Mini-Slide Sleeving System offers a comprehensive solution to slide finishing. Slide sleeving is customer preferred because it protects valuable slides from dirt, dust and finger prints. Labs like sleeving because the are easy, practical and cost-effective—and because it demonstrates their commitment to quality to their customers.

MM-100 Specifications:*

Width: 14-1/2" (36.8 cm)

Depth: 12" (30.5 cm)

Height: 11" (28.0 cm)

36-1/2" (92.7 cm) with arbor support

Net Weight: 18 pounds (8.17 kg)

Shipping Weight: 22 pounds (9.98 kg)

Power Requirements: 115 VAC, 50/60 Hz

Cycle Rate: 40+ slides per minute

Mounts: Pakon plastic—1.3 mm or 1.8mm thick, Standard No-Float Mount, Pro Mount, Pin-Lock Mount, Transparency Proof Mount

Accessories: MI-100 imprinter for dating and numbering, Arbor support and 5 arbors

*Specifications subject to change without notice.
